Stealth Computer Corporation IS Awarded Product of the Year for Bright LCD Monitor Product

Toronto ~ January 2006 – Stealth Computer Corporation announced that readers of *Plant Engineering Magazine* have voted the StealthVU High Brightness LCD Monitor a Gold winner in the 2005 Plant Engineering Product of the Year Awards competition. The 18th annual competition recognizes major new products across 15 categories, including Control Equipment, Electrical Power, and Instruments etc. A panel of plant engineers screens initial entries and then readers are invited to vote on their choices for the best overall products. Award winners will be honored at the National Plant Engineering & Management Show black-tie awards reception in Chicago on March 21, 2006.

Stealth's High Brightness LCD earned the first place Gold Award in the Control Equipment category. The StealthVU-HB industrial grade monitors are extreme brightness sunlight readable LCD's that are designed to operate in high ambient light conditions. StealthVU-HB monitors outperform commercially available products that wash out in direct and indirect sunlight conditions.

"Winning the first place gold award is an honor as the winners are voted on by the readership of the magazine," said Ed Boutilier, President & CEO of Stealth Computer. This award is a significant accomplishment of which we are exceptionally proud.
