STEALTH INTRODUCES NEMA 4 /4X HIGH BRIGHTNESS SUNLIGHT READABLE LCD MONITORS

Toronto ~ August 2002 – Stealth has introduced their Model: StealthVU-HB high-bright, sunlight readable Industrial Grade LCD monitor. The StealthVU-HB series of monitors are powerful sunlight readable displays that are designed to operate in extreme ambient light conditions. StealthVU-HB monitors outperform commercially available products that wash out in direct and indirect sunlight conditions. The 15" diagonal sized monitor has a brightness rating of 1800 Nits, which is roughly 7 times the brightness of a commercially available desktop monitor. The NEMA 4/4X rated monitor is available in various Touch Screen configurations and is built to withstand the demanding environments of the shop floor. The StealthVU High Bright LCD's are ideal choices for applications such as, Human-Machine Interface, marine/mobile, interactive kiosks or demanding applications where vital information must be displayed.

Stealth Computer Corporation is an ISO9001 Canadian owned and operated company with its headquarters in Woodbridge Ontario. Stealth continually develops innovative products designed to meet the exact needs of their clients. For over a decade Stealth products have been used in industrial, commercial, scientific, Government and military applications.
