An In-Depth Look Into What Makes Our SR-4000 RackMount PC So Popular

Looking into the SR-4000 shows a versatile RackMount PC that fits the needs of many specialized industry applications

The Stealth SR-4000 Industrial PC is specifically designed for system reliability. The system incorporates our Smart Fan technology, which continually monitors the internal temperature and adjusts the fan speed to keep it constant. Front cooling fans are filtered ensuring toxic and non-toxic particles are kept out as they can cause disastrous and costly down times.

The SR-4000 systems are built with standard ATX mainboards or Passive Backplane and Single Board Computer technology. Up to 14 ISA/PCI expansion slots are available for slot intensive applications. Standard

configuration includes hard drive, floppy drive, CD-ROM, 300-watt power, dual temperature sensing cooling fans and the operating system installed and tested. The latest Intel processing power is available to handle even the most demanding applications.

Whether your application is Telecommunications, Process Control, MMI, Medical, Factory Automation or Military, Stealth can build a system that fits your exact needs. View all the specifications of our popular SR-4000 at: www.stealthcomputer.com or call us Toll Free to discuss your application today, 1-888-STEALTH

New Stealth Ultra-Thin RackMount PC's Mean That "More is Less"

In today's Rack World, real estate is at a premium. There is an ever demanding need to pack more technology into smaller spaces.

The Stealth SR1000/2000 series Rackmount computer systems were designed to provide optimum processing power in minimal amounts of space.

The Stealth SR-1000 1U Rackmount PC is only 1.75" high and packs in a standard ATX Motherboard or a Single Board Computer with a wide range of Processor, Memory and Drive options. The Stealth SR-2000 2U Rackmount PC is only 3.5" high and is ideal for applications that require a Rackmount PC with increased

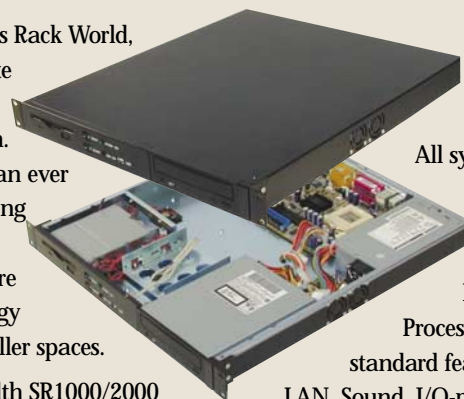

storage and expansion capability.

All systems are available with the latest Intel Pentium Processors and standard features such as:

LAN, Sound, I/O-ports, and on-board Video. Extra expansion capability is available for add-in ISA/PCI card slots.

All Stealth systems are built to your exact requirements and undergo extensive quality assurance testing to ensure long-term reliability.

DeskTop Power & Expansion In A Portable PC

The Secret: The StealthBOX Warrior. A Multi-Slot portable PC that offers lots of slots for ISA/PCI cards. Built to meet your exact needs in the shop and on the road.

This Stealth Warrior is ideal for those who require the power and expansion capability of a full sized desktop PC in a tough mobile package. The rugged Multi-Slot StealthBOX Warrior is enclosed in metal with a built-in 108-button full size keyboard and an adjustable TFT Display. The systems are designed with Passive Backplane and Single Board Computer technol-

ogy, which provides for open ISA/PCI expansion card slots that can no longer be found in a traditional PC motherboard design. The latest Intel processor technology is supported offering unprecedented power in a mobile package. Discover the full range of options for the StealthBOX Warrior at: www.stealthcomputer.com or call us today to discuss your application Toll Free: 1-888-STEALTH

THINK THINK
