#### **PRODUCT DESCRIPTION**

The Stealth Computer model LPC-720F is a high performance, fanless, rugged mini PC with dual expansion slot capability designed for a large variety of demanding applications. The LPC-720F can be configured with (2) PCI slots or (2) PCIe x1 slots. Ideal applications would be for data acquisition, specialized graphics cards and expanded I/O cards.

Stealth's LPC-720F is a small sized computer that operates without noisy cooling fans that can therefore draw in dirt and dust causing catastrophic failures. Stealth's fanless computers are encapsulated in a rugged extruded aluminum chassis that performs as a heat sink to dissipate internal heat build-up. See our FAQ – Why Choose Fanless?

The Stealth LPC-720F Little PC is packed with features including, 2x USB 3.0, 6x RS232/Serial, 2x GB LAN ports, equipped with a 128GB MLC SSD (Solid State Drive), up to 16GB of memory, VGA, DVI-D & HDMI video connectors, audio in/out and much more.

The LPC-720F is an excellent choice for industrial and commercial applications which include, HMI, Embedded Control, Digital Signs, process control, Interactive Kiosks, and Thin-Client applications.
