PRODUCT DESCRIPTION

Stealth's SR-28452 wide temperature Fanless Rack Server/PC is a dual system built into a slim 3.5" high (2U) rack mountable steel chassis with locking/latching front door. It is also available in a single configuration.

Operational in temperatures ranging from -25°C – 70°C, the noise free fanless design provides a high-performance solution that uses powerful Intel 10th Gen Core i5, i7 and i9 Mobile Processors without the need for noisy cooling fans that can draw in dust and potentially cause catastrophic failures. Per system, up to 64GB of DDR4 RAM is supported, along with 4TB in solid state drives (SSD) when equipped with 2 drives total. Raid 0/1 options are available for multiple drive configurations. The space saving design features a rugged extruded aluminum chassis that provides superior heat dissipation.

Stealth's SR-28452 Fanless Rack PC is designed to handle 4K Ultra HD Resolution video and can support up to three displays per system via Display Ports. An abundance of I/O ports on each PC includes USB 3.2, RS232 Serial, Gigabit networking, external SIM card sockets for 4G wireless connectivity, audio and 8x DIO (Digital input/output) ports with electrical isolation of digital signals. Port expansion is available via single or dual-channel CAN Bus or by including any of the optional 10GB LAN, RJ45 PoE or USB 3.0 ports in the Universal Bay. The inclusion of a 9-48 VDC power inputs with Over Voltage, Over Current and Reverse Polarity Protection, along with optional 5G communications makes the SR-28452 extremely mobile friendly.

The SR-28452 is UL, CE, FCC & RoHS certified, and designed for use in a multitude of applications including; Transportation, IoT, IIoT, Audio/Video recording, Embedded Control, Digital Signs, Interactive Kiosks, Thin-Clients, and Human/Machine Interface.
