PRODUCT DESCRIPTION

StealthBOX Multi-slot Portable Expansion PCs are highly customizable rugged computer workstations designed for people who require the power and expansion capability of a desktop PC in a portable package. The Stealth model StealthBOX-Warrior2-ATX-17 is designed for when the user cannot haul their desktop PC to customer sites, hostile environments or remote locations. The StealthBOX portable provides performance and expansion capability not found in Notebook and Laptop PCs.

The following are example applications that StealthBOX has been used in:

- Instrumentation and Control
- Field service & diagnostic application in many industries
 - Portable servers & workstations
 - Network and communications testing
 - Data acquisition
 - Geophysical exploration
 - Video and audio editing on location
