The StealthVU 6.4" Flat Panel Monitor is extremely compact and ideal for situations where conventional sized monitors won't fit into tight spaces. This mini monitor is an ideal companion of the newly released littlePCs with its small size form factor being able to fit into space challenged applications. Also operating from 12 VDC allows it to be easily deployed in mobile and field applications. Stealth Industrial LCD monitors are ideal for Operator Interface, Machine Control, Plant Floor or any application that requires superior image quality in a thin, low powered industrial package. Stealth provides wide ranges of industry proven products designed for continuous 24-hour operation and yet are priced to meet your budget!
