

35 STEALTH SPC SERIES

THE SMART INVESTMENT
IN PANEL PCS

Efficient | Futureproof | Reliable

Shop Now

Welcome to the next generation of industrial Panel PCs.

The **Stealth SPC Series** is designed to help you **invest smarter, perform better,** and **save more** on total costs. Whether you're facing harsh environments or demanding workloads, the SPC Series is built to handle it all with **efficiency, reliability, and futureproof performance.**

At Stealth, we know that **performance, security, and longevity** are essential to your business. That's why our **SPC Series Panel PCs** come with **Trusted Platform Module (TPM) 2.0 onboard**, providing you with **advanced security** to protect against tampering and unauthorized access. Combine that with **desktop-class power** and **rugged durability**, and you have a system ready to tackle the toughest challenges.

When performance, security, and longevity matter, Stealth delivers.

**35 STEALTH
SPC SERIES**
NEXT GEN INDUSTRIAL PANEL PCS

**INVEST SMARTER
PERFORM BETTER, SAVE MORE**

- 40-50%** Longer Lifespan
- 75-80%** Less Downtime
- 10-15%** Higher Efficiency
- 60-70%** Lower Maintenance & Repair Costs

Reduce Total Cost of Ownership by **25-30%** over 5 years.

Get Ready for Unmatched Performance

With the **Stealth SPC Series**, you're investing in **long-term reliability and efficiency.** Our next-gen Panel PCs offer **desktop-class power, data protection,** and **rugged durability** to withstand industrial demands. Discover how upgrading your system can **save you money and keep your operations running seamlessly.**

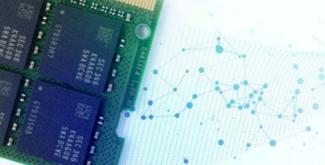

CPU Mark of 11,859

15% more efficient | 57% more powerful

More Power. More Speed. And More Efficiency.

Why compromise on power?

The **Stealth SPC Series** with **Intel Core i3** processors offers **57% more power** than mobile-grade processors, delivering **desktop-class performance** for demanding workloads. Gain **15% higher efficiency** with enhanced security and connectivity, ensuring your system never falls behind.

Windows IOT | RAID Support | TPM 2.0

Data Protection You Can Count On

Forget about data loss, unnecessary updates, and security risks.

The SPC Series, powered by **Windows IoT Enterprise**, guarantees **long-term stability with no forced upgrades.** Equipped with **RAID support**, your data remains protected from loss and downtime. Plus, with **TPM 2.0 onboard**, your system stays secure from unauthorized tampering. **Minimize productivity losses by 75-80%** and keep operations running without interruptions.

Rugged Aluminum Chassis | Wide Temperature
Nema4/IP65 | Industrial-grade components

Engineered for Rugged Environments

Made for harsh environments, the SPC Series is **built to last.**

With a **rugged aluminum chassis, industrial-grade components,** and **wide temperature tolerance (-30 to +85°C)**, these systems are designed to endure. The **Nema4/IP65 compliant bezel** protects against dust and moisture, making it the go-to choice for industrial applications.

Plus, reduce maintenance and repair costs by **60-70%**.

Reducing long-term costs, and replacements.

Future Ready | Industrial Grade

Built to make your investment last

Stealth's SPC Series Panel PCs are built for what's next, **offering industrial-grade reliability for 7 to 10 years,** with the **flexibility to upgrade processors without replacing the entire system.** While other panel PCs become obsolete in just a few years, the SPC Series is designed to **last longer, reduce downtime, and lower your long-term costs.**

More Power. More Reliability. More Savings.

Investing in the **Stealth SPC Series** means more than just high performance—it means **long-term savings.**

With a **25-30% reduction in Total Cost of Ownership (TCO)** over 5 years, the SPC Series delivers:

40-50% Longer Lifespan | **75-80%** Less Downtime | **10-15%** Higher Efficiency | **60-70%** Lower Costs

Discover the smarter choice—Stealth SPC Series.

You'll **recover your investment in just 2 years,** with years of uninterrupted performance and cost savings to follow. Unlike standard panel PCs that come with hidden costs, **Stealth SPC** gives you **reliability and efficiency that last.**
